Prose line 01 explains the functions in the table below and runs across the whole width of the page.
Prose line 02 explains the functions in the table below and runs across the whole width of the page.
Prose line 03 explains the functions in the table below and runs across the whole width of the page.

function_name_number_01(value)	Returns what function 01 computes from its argument.
function_name_number_02(value)	Returns what function 02 computes from its argument.
function_name_number_03(value)	Returns what function 03 computes from its argument.
function_name_number_04(value)	Returns what function 04 computes from its argument.
function_name_number_05(value)	Returns what function 05 computes from its argument.
function_name_number_06(value)	Returns what function 06 computes from its argument.
function_name_number_07(value)	Returns what function 07 computes from its argument.
function_name_number_08(value)	Returns what function 08 computes from its argument.
function_name_number_09(value)	Returns what function 09 computes from its argument.
function_name_number_10(value)	Returns what function 10 computes from its argument.
function_name_number_11(value)	Returns what function 11 computes from its argument.
function_name_number_12(value)	Returns what function 12 computes from its argument.
function_name_number_13(value)	Returns what function 13 computes from its argument.
function_name_number_14(value)	Returns what function 14 computes from its argument.

Prose line 04 explains the functions in the table below and runs across the whole width of the page.
Prose line 05 explains the functions in the table below and runs across the whole width of the page.
